EDUCATION

Jose Maria College

Bachelor of Science in Information Technology

- Relevant Coursework: Cloud Computing, Data Structures and Algorithms (C++), Web Development (JavaScript).

PROFESSIONAL EXPERIENCE

EBOS PH

Full Stack Developer

Remote

- Engineered custom financial and accounting modules, tailoring platform functionality to meet complex user requirements and improve reporting accuracy.
- Optimized MySQL database performance, utilizing strategic indexing to significantly reduce query response times and enhance overall application speed.
- Collaborating closely with the team to streamline workflows and ensure consistent, on-time delivery of high-priority features.
- Modernized development workflows by implementing version control via GitLab, establishing better code integrity and team collaboration standards.

MEDIA CONQUEST

Full Stack Developer

Remote Part-time

- Refactored legacy API architecture, resolving critical bugs and optimizing PHP data-fetching logic to ensure a more reliable and responsive user experience.

PROJECTS

Inventory, Manufacturing & Payroll Suite

Technologies: Laravel, Vue.js, Inertia.js, Tailwind CSS, MySQL

- Architected a comprehensive ERP-style system supporting complex manufacturing profiles, diverse unit conversions, and custom container tracking.
- Integrated Automated PDF generation to streamline payroll processing and document management.
- Boosted system efficiency by 20% through the optimization of real-time data fetching and the development of a dynamic reporting engine.

Automated Community Discord Bot

Technologies: Python

- Developed a multi-functional community tool featuring automated giveaway systems, "Secret Santa" exchange gift logic, and event registration tracking.
- Simplified event management by building a custom sign-up sheet integration, allowing moderators to monitor participation in real-time.

TECHNICAL SKILLS

Programming Languages: Python, Php, JavaScript, TypeScript, C#

Frameworks and Tools: Vue.Js, Laravel, MySQL, Cpanel, Git Actions, Microsoft SQL Server, Digital Ocean

API Integration: Klaviyo, Xero, HelloSign, Sanction Scanner, TinyMc
